Manual

MADE IN KOREA

Please leave this manual where the user can always see.

Name of each part

Do you prefer the non fat food ?

Food doesn't stick to the plate & the endurance is surprisingly improved by its Triple Teflon Coating.

- Compact design
- Separate oil container
- Separate pan (easy to be cleaned)
- Water Proof Heater
- Automatic Temperature Controller
- Anti over-heating system
- Heat censor indicating right time for cooking.

Characteristics of the product

Practical & smart size

By increasing the pan size & reducing the whole size, you can comfortably put the gadget on the table and cook practically.

Separate oil container

Eliminate the smoke & smell while cooking and easy to be cleaned.

Separate pan (easy to be cleaned)

As the main body & the pan can be completely separated, you can easily clean the gadget.

Triple Teflon Coating

By its triple Teflon coating, food doesn't stick to the plate, the endurance is much Improved, and more, even cleaning is very easy after cooking.

Automatic Temperature Controller

You can comfortably set up the temperature of your choice.

Double safety system

Anti over-heating system & the temperature censor assures the safety of cooking.

Temperature censor

Temperature Censor indicates the right time of cooking

Made in Korea

All the design & production is made in Korea

Detailed parts of product

As all the parts except heat wire can be dissembled, you can comfortably clean the gadget, and even use the dishwasher.

- **Compact design**
 - Heat wire directly attaches the plate, which makes the thick food easily cooked.
- **Grill plate**
 - Heat resistant tempered Aluminum
- **Body**
 - Heat resistant plastic
- **Separate oil container**
 - Heat resistant tempered aluminum

How to keep and clean

1. Separate the temperature controller from the main body before cleaning.
2. Use barely wet kitchen towel or dishcloth when cleaning temperature controller.
3. Completely eliminate the food grounds or stain on the plate with kitchen towel or dishcloth.
4. Rub the neutral detergent on the dishcloth and clean the plate
5. Clean the neutral detergent on the plate with barely wet dishcloth (Water cleansing is available but don't spill the water downwards to the plate)
6. Dry the product completely without the exposure of direct light and keep it in a safe place

*** Don't use the acid or alkaline detergent and don't use coarse cloth in cleaning**

Self checking points before asking "After service"

There's no heat on the plate

- Make sure that the voltage is 220V
- Make sure that the plug is properly connected with socket
- Make sure that the temperature controller is properly connected with the main body
- Make sure that the temperature is set up

There's smoke from the plate

- Small amount of smoke can come out for the first time of use because of the coating oil
- Heat the plate for 5 minutes where the fresh air circulates and start using it

The lamp of the temperature controller is flickering

- The lamp indicates that the heating function is running
- The lamp signal is "OFF" when the heat supply reaches to the set-up temperature and comes back to "ON" when the temperature goes down from the set-up point, which is the normal function. If you want to increase the temperature, raise the level of each set-up point

Cautions for the safe usage

Don't touch the product with wet hands – danger of electric shock

Don't step on the cord – danger of fire

Don't connect many plugs in one socket at a time – danger of fire

Make sure to take out the plug, not to take out the cord from the socket- danger of electric shock and short circuit.

Specification

- Product name : TIGER QUEEN Electric Smart Grill
- Model name : SQ-S700
- Origin : Republic of Korea
- Voltage : 220V~, 50Hz
- Size : 415 X 217 X 63 (WxDxHmm)
- Electric Power consumption : 1250 W
- Pan SIZE : 302 X 217 (W X Dmm)
- Weight : 2.2kg
- Material : Aluminum diecasting / Heat resistant plastic
